Summary of recruitment

Marcos, before starting classes on January 29, contacted the members of the current team since he had worked with them and approved the subjects that he had worked with them as DP1, IISSI 1 and IISSI 2, and with which he had They received good feedback and had achieved a good attitude as the projects progressed, setting the project objectives and planning the tasks from the beginning. Due to this, the rest of the members responded affirmatively to his request to join the project team.

From the beginning, WhatsApp and Discord tools were used for communication between members and for holding future meetings.

Group Members

For every member of your workgroup provide: contact data (surnames, names, corporate email address, and recent picture – no avatars or old pictures, please).

Student #1

ID Number: 54181123T
UVUS: albdmrui
Name: Domínguez-Adame, Alberto
Roles: Manager, Developer

Student #3

ID Number: 05934857Y
UVUS: marolmmar
Name: Olmedo Marín, Marcos
Roles: Tester, Developer

Student #5

ID Number: 49852809X
UVUS: alemerpai
Name: Merino Palma, Alejandro
Roles: Analyst, Developer

Student #2

ID Number: 49389248Z
UVUS: ismherram
Name: Herrera Ramírez, Ismael
Roles: Developer, Tester

Student #4

ID Number: 76269995V
UVUS: marizqlav
Name: Izquierdo Lavado, Mario
Roles: Operator, Developer

Commitment to the project

A statement in which you all commit to working together in this subject, declare that you have understood its syllabus, with a special emphasis on the evaluation and grading procedures, and commit to achieving a particular mark.

The members of this group fully commit to work together in this project, having understood the contents of the syllabus, specially the evaluation and grading procedures. Furthermore, we commit to achieving a mark of B / Notable (7.0 – 8.9 points).

Performance indicators

During the course we will use a variety of tools and indicators to track the performance of each member:

- Clockify: each member will use this tool while working on the project. Time will be only used to penalize if the member is not delivering the work demanded of them, in order to not punish efficiency.
- Github: the number of commits and lines of code of the repository (<https://github.com/marizqlav/Acme-L3-D01.git>) will be reviewed to ensure that the workload is as evenly distributed as possible.
- Attendance:
 - Group meetings: members should attend at least to 75% of the scheduled group meetings, justified non attendance will be forgiven.
 - Class: if a member is lacking in productivity, and fails to attend classes more often than not, it will be viewed as a negative.

Member behaviour

Rewards

If the member provides good services to the team, such as extra code, good organization, good communication, etc it will be rewarded with ...

- Reduce workload on the following deliverable.

Punishments

In the case of a member who fails to provide the minimum work assigned to them while not showing good indicators in the section above, the following punishments will be enforced:

- Has to work more on reports on the next deliverable.

Expulsion

On the pretense that the member not only fails to deliver their requested work, but doesn't deliver any whatsoever and fails to justify in any way, shape or form, expulsion from the group will take place.

Conclusion

In conclusion, we have distributed the work correctly, which will allow us to work at an adequate pace. As it is the first deliverable, we do not have a reference that we have to improve, but we will work on everything necessary.

Bibliography

Intentionally blank.
