Introduction

This document covers the information relative to the team who will develop Software in DP2's C1.04.14 laboratory group during the 2022-2023 course, including: the tasks during the sprint 2 of development in Acme L3, including information about each one, as well as the estimated budget for the specified activities and the total.

This document has the following structure:

- Contents
 - Tasks 2
 - Budget 2
- Conclusions
- Bibliography

Contents

Tasks 2

- Task 9:

- Succinct description:

The system configuration must include the following initial data:

- A system currency, which must be initialised to “EUR”.
- A list of accepted currencies, which must be initialised to “EUR”, “USD”, and “GBP”.
- Assignees and roles: Mario Izquierdo Lavado, Operator, Develop.
- Planned time: 30 minutes.
- Actual time: 20 minutes.

- Task 10:

- Succinct description: A peep is a message posted by anyone. The system must store the following data about them: an instantiation moment (in the past), a title (not blank, shorter than 76 characters), a nick (not blank, shorter than 76 characters), a message (not blank, shorter than 101 characters), an optional email address, and an optional link..
- Assignees and roles: Ismael Herrera Ramirez, Developer, Tester.
- Planned time: 35 minutes.
- Actual time: 35 minutes.

- Task 11:

- Succinct description: A bulletin is a message posted by an administrator. The system must store the following data about them: an instantiation moment (in the past), a title (not blank, shorter than 76 characters), a message (not blank, shorter than 101 characters), a flag to indicate whether it is critical or not, and an optional link with further information.
- Assignees and roles: Marcos Olmedo Marín, Tester, Developer
- Planned time: 30 minutes.
- Actual time: 35 minutes.

- **Task 12:**
 - Succinct description: An offer is a record in which an administrator advertises something. The system must store the following data about them: an instantiation moment (in the past), a heading (not blank, shorter than 76 characters), a summary (not blank, shorter than 101 characters), an availability period (at least one day after the offer is instantiated and must last for at least one week), a price (positive, possibly nought), and an optional link with further information.
 - Assignees and roles: Mario izquierdo Lavado, Operator, Developer
 - Planned time: 30 minutes.
 - Actual time: 35 minutes.

- **Task 13:**
 - Succinct description: A note is a message posted by an authenticated principal. The system must store the following data about them: an instantiation moment, a title (not blank, shorter than 76 characters), an author (not blank, shorter than 76 characters), a message (not blank, shorter than 101 characters), an optional email address, and an optional link. The author must be computed as follows: “{username} - {surname, name}”, where “{username}” denotes the username of the principal who has posted the note and “{surname, name}” denotes his or her full name.
 - Assignees and roles: Alberto Domínguez-Adame Ruiz, Manager, Developer
 - Planned time: 30 minutes.
 - Actual time: 35 minutes.

- **Task 14:**
 - Succinct description: A note is a message posted by an authenticated principal. The system must store the following data about them: an instantiation moment, a title (not blank, shorter than 76 characters), an author (not blank, shorter than 76 characters), a message (not blank, shorter than 101 characters), an optional email address, and an optional link. The author must be computed as follows: “{username} - {surname, name}”, where “{username}” denotes the username of the principal who has posted the note and “{surname, name}” denotes his or her full name.
 - Assignees and roles: Alejandro Merino Palma, Analyst, Developer
 - Planned time: 30 minutes.
 - Actual time: 35 minutes.

- **Task 15:**
 - The system must handle administrator dashboards with the following indicators: total number of principals with each role; ratio of peeps with both an email address and a link; ratios of critical and non-critical bulletins; average, minimum, maximum, and standard deviation of the budget in the offers grouped by currency; average, minimum, maximum, and standard deviation of the number of notes posted over the last 10 weeks.
 - Assignees and roles: Ismael Herrera ramirez, Developer, Tester
 - Planned time: 20 minutes.
 - Actual time: 20 minutes.

- **Task 16:**
 - Succinct description: Produce an analysis report.
 - Assignees and roles: Everyone.
 - Planned time: 45 minutes.
 - Actual time: 40 minutes.

- **Task 17:**
 - Succinct description: Produce a planning report.
 - Assignees and roles: Everyone.
 - Planned time: 35 minutes.
 - Actual time: 25 minutes.

- **Task 18:**
 - Succinct description: Produce a UML domain model.
 - Assignees and roles: Everyone.
 - Planned time: 120 minutes.
 - Actual time: 130 minutes.

Budget 2

The following diagram shows the number of hours dedicated to each of the project roles, the personnel cost for each of the project roles, the amortization cost and the totals, the working hour of a manager or an analyst costs €30.00 and the work hour of the other roles costs €20.00:

- **Alberto/Manager:** 30.00€/h → 35+40+25+130= 3 h, 50 min → 115.00€
- **Alejandro/Analyst:** 30.00€/h → 35+40+25+130 = 3 h, 50 min → 115.00€
- **Ismael/Developer:** 20.00€/h → 35+20+40+25+130 = 4 h, 10 min → 83,33€
- **Marcos/Tester:** 20.00€/h → 35+40+25+130 = 3 h, 50 min → 76.66€
- **Mario/Operator:** 20.00€/h → 20+35+40+25+130 = 4 h, 10 min → 83.33€

Total: 473.32€

Conclusion

So far the time required to complete the tasks is close to the time estimated. Although some activities have required more time than estimated, we have made templates to reduce the time spent working on documentation for future projects.
